THE PROBLEM

Hundreds of applications, and the callbacks never come

You have done everything the portals ask. Tailored the CV, filled the forms, clicked apply until it stopped meaning anything.

Still waiting.

THE IDEA

People hire people, so Knock starts with the people

THE PORTAL

A queue

Someone at the front of the queue is already talking to a person they were introduced to.

THE DOOR

A person

A real conversation with someone who works there is where referrals and interviews begin.

Knock finds the right people at your target companies, researches each one, and opens the conversation. **You approve every message.**

Four steps from a list of companies to a conversation with someone inside

1

You pick your targets

Tell us the companies and roles you want. Ten companies is plenty.

2

We find the right people

Hiring managers, future teammates, alumni and senior people who can introduce you. Researched one by one.

3

We write to each one

A short, personal first message, built on something you genuinely share.

4

We guide every reply

We draft your answers and steer each conversation until it becomes a referral or an interview.

You approve every message. Sent from your own LinkedIn, in your own name, or done for you.

Your target list names real people and a reason to talk to each

For a move into product at Zepto.

WHO	WHERE	THE SHARED REASON TO TALK	STATUS
Hiring manager, Product	Zepto	Both started in FMCG brand roles before product	● Message drafted for you
Product manager, Growth	Zepto	Same college, three batches apart	● Message drafted for you
Senior PM, Quick commerce	Blinkit	Wrote about a launch you worked on as a brand manager	○ Researching

A short list of people who can actually move your application, each chosen for a reason.

Sample for illustration, showing 3 of the 60 people in a Sprint. Real lists name real people.

A good first message is short, specific and about them

To Rahul

Product, Zepto · previously Flipkart

Hey Rahul,

- 1 saw you moved from Flipkart into product at Zepto.
- 2 I'm making a similar jump from brand management.
- 3 Curious, what was the biggest adjustment for you?

Approved by you. Sent from your LinkedIn.

WHY IT WORKS

1 Proves we looked.

It names something real about their path, so it cannot be mistaken for a mass message.

2 Gives a reason to talk.

A shared move makes you a peer, not a stranger asking for a favour.

3 Asks something easy.

One question they can answer in a line. No referral ask yet.

60 hand-picked people and one reader per message is the opposite of spam

60

hand-picked people,
each chosen for a reason.
Not 6,000 messages.

One reader per message

Every message is written for one person. No templates with a name swapped in. If it could be sent to anyone, we do not send it.

Talk first, ask later

Nobody refers a stranger. We open with curiosity, earn the reply, and ask for the referral once there is something real between you.

Research, relevance, follow-up

The way good sales teams reach busy people, applied to the one product you know best: you.

Each week: the list, the research, the messages and a results report
